Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE <u>3</u> MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) ☒ Responsive to communication(s) filed on <u>23 July 2010</u>.

2a) ☐ This action is **FINAL**.   2b) ☒ This action is non-final.

3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) ☒ Claim(s) <u>1-13</u> is/are pending in the application.

    4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5) ☐ Claim(s) _____ is/are allowed.

6) ☒ Claim(s) <u>1-13</u> is/are rejected.

7) ☐ Claim(s) _____ is/are objected to.

8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) ☐ The specification is objected to by the Examiner.

10) ☒ The drawing(s) filed on <u>24 August 2006</u> is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.

    Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

    Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

    a) ☒ All   b) ☐ Some *   c) ☐ None of:

      1. ☒ Certified copies of the priority documents have been received.

      2. ☐ Certified copies of the priority documents have been received in Application No. _____.

      3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

    * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) ☒ Notice of References Cited (PTO-892)

2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)

3) ☒ Information Disclosure Statement(s) (PTO/SB/08)
    Paper No(s)/Mail Date <u>10/09/2007</u>.

4) ☐ Interview Summary (PTO-413)
    Paper No(s)/Mail Date. _____ .

5) ☐ Notice of Informal Patent Application

6) ☐ Other: _____ .

DETAILED ACTION

1. ***Claims 14-21*** have been withdrawn.

2. ***Claims 1-13*** are pending.

3. ***Claims 1-13*** are rejected.

Claim Rejections - 35 USC § 103

4.   The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5.   ***Claims 1 and 9-13 are rejected*** under 35 U.S.C. 103(a) as being as being

anticipated over Sayeedi et al (Pub No.: US 2002/0145999 A1) and further in view of

Bao et al (Pub. No.: US 2004/01966826 A1).

As per claim 1, Sayeedi discloses: a method of operating a packet

network, comprising the steps of:

-   processing a message (Sayeedi, paragraph 0006) wherein the request

received can be the message as claimed ***in a standardized interface*** (Sayeedi,

paragraph 0005) wherein the A1 through A11 interfaces can be the standardized

as claimed, ***the message including an indicia*** (Sayeedi, paragraph 0005)

wherein the DRS bit included in the request can be the indicia as claimed. Sayeedi does not specifically disclose **identifying a packet application in response to the indicia.** However Bao discloses **identifying a packet application in response to the indicia** (Bao, paragraph 0036).

Therefore it would have been obvious to one of ordinary skill in the art at the time of invention was made to incorporate Bao teaching of identifying the packet application into Sayeedi System because this would have provided a way to optimize the system to process messages differently based on the application corresponding to the message;

As per claim 2, claim 1 is incorporated and Sayeedi further discloses that the standardized interface is an A1 interface (Sayeedi, Fig 1, paragraph 0005); Sayeedi teaches A1-A11 interfaces and in addition Fig 1 shows the use of A1 interface between the Source BS and the MSC;

As per claim 3, claim 1 is incorporated and Sayeedi further discloses that the standardized interface is an A3 interface (Sayeedi, Fig 1, paragraph 0005); Sayeedi teaches A1-A11 interfaces and in addition Fig 1 shows the use of A3 interface between the Target BS and the Source BS;

As per claim 4, claim 1 is incorporated and Sayeedi further discloses that the standardized interface is an A5 interface (Sayeedi, Fig 1, paragraph

0005); Sayeedi teaches A1-A11 interfaces and in addition Fig 1 shows the use of

A5 interface between the Source BS and the MSC;

As per claim 5, claim 1 is incorporated and Sayeedi further discloses

that the standardized interface is an A7 interface (Sayeedi, Fig 1, paragraph

0005); Sayeedi teaches A1-A11 interfaces and in addition Fig 1 shows the use of

A7 interface between the Target BS and the Source BS;

As per claim 6, claim 1 is incorporated and Sayeedi further discloses

that the standardized interface is an A9 interface (Sayeedi, Fig 1, paragraph

0005); Sayeedi teaches A1-A11 interfaces and in addition Fig 1 shows the use of

A9 interface between the Source BS and the PCF;

As per claim 7, claim 1 is incorporated and Sayeedi further discloses

that the standardized interface is an A10 interface (Sayeedi, Fig 1, paragraph

0005); Sayeedi teaches A1-A11 interfaces and in addition Fig 1 shows the use of

A10 interface between the PCF and the PDSN;

As per claim 8, claim 1 is incorporated and Sayeedi further discloses

that the standardized interface is an A11 interface (Sayeedi, Fig 1, paragraph

0005); Sayeedi teaches A1-A11 interfaces and in addition Fig 1 shows the use of

A11 interface between the PCF and the PDSN;

As per claim 9, claim 1 is incorporated and Sayeedi further discloses that the packet application is a control plane packet application (Sayeedi, Fig 1, paragraph 0020, 0025*);*

As per claim 10, claim 1 is incorporated and Sayeedi further discloses that the packet application is a bearer packet application (Sayeedi, paragraph 0006*)*

As per claim 11, claims 1 is incorporated and Sayeedi does not specifically disclose that the packet application is a push-to-talk packet application. However Bao discloses *that the packet application is a push-to-talk packet application* (Bao, abstract, paragraph 0036).

Therefore it would have been obvious to one of ordinary skill in the art at the time of invention was made to incorporate Bao teaching of using a push to talk packet application into Sayeedi System because this would have provided a way to optimize the system to support the push-to-talk applications;

As per claim 12, claims 1 is incorporated and Sayeedi does not specifically disclose that the packet application is a Voice-over-IP packet application. However Bao discloses *that the packet application is a Voice-over-IP packet application* (Bao, abstract, paragraph 0036).

Therefore it would have been obvious to one of ordinary skill in the art at the time of invention was made to incorporate Bao teaching of using a push to talk packet application into Sayeedi System because this would have provided a way to optimize the system to support the VOIP applications;

As per claim 13, claims 1 is incorporated and Sayeedi does not specifically disclose that the packet application is a delay-sensitive packet application. However Bao discloses *that the packet application is a delay-sensitive packet application* (Bao, abstract, paragraph 0036).

Therefore it would have been obvious to one of ordinary skill in the art at the time of invention was made to incorporate Bao teaching of using a push to talk packet application into Sayeedi System because this would have provided a way to optimize the system to support the delay-sensitive applications;

Conclusion

6.   The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HAMZA ALGIBHAH whose telephone number is (571)270-7212. The examiner can normally be reached on Monday-Thursday, 7:30AM-5:00PM, EST, Alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Firmin Backer can be reached on 571-272-67036703. The fax phone

number for the organization where this application or proceeding is assigned is 571-

273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
